

Ambience & RGBW LED

PRODUCT
INFORMATION

StellarSky
SYSTEMS

Ambience

- The highest-quality RGBW Controller to be fully integrable with Home Automation Systems. Using ASCII commands.
- With 8 individual addresses, you can control up to 8 zones independently while only having to use one Control Interface or one of your systems RS232 ports.
- 480W total or 6 standard reels of RGBW LED Strip
- Compatible for use with 12V or 24V LEDs.
- Many features developed with installers, integrators in mind.

High-Quality RGBW LED Strip

- Create any color using the RGBW all in one chip design.
- One reel = 72 watts or 6 amps @ 12V
- One reel = 5 meters or 16.4 feet or 197 inches
- Electrical current limitations require a lead wire for every reel.
- The highest quality LED strip on the market. No color variants, no dead spots...every reel.
